WORK EXPERIENCE

Network Administrator 2026 - Present
UST Global - Hillsboro, OR

- Administer enterprise network infrastructure supporting 200+ server systems, ensuring high availability across production and lab environments.
- Manage Layer 2/Layer 3 networking, including switch configuration, VLAN administration, IP addressing, and network troubleshooting.
- Coordinate infrastructure changes across network, systems, and operations teams to minimize downtime during deployments and maintenance windows.
- Monitor network performance and availability, diagnose connectivity and performance issues, and implement corrective actions to improve reliability.

Lab Technician 2025 - 2026
UST Global - Hillsboro, OR

- Built an internal Python CLI integrating REST APIs and system utilities to automate technician workflows, reducing manual effort by approximately 30%.
- Developed Python, Ansible, and PowerShell automation to orchestrate security patching and configuration deployment across 1,300+ server systems, reducing execution time by 40%.
- Diagnosed OS, firmware, and hardware failures in a high-volume enterprise environment, consistently exceeding SLA targets while helping reduce team backlog by 25%.

PROJECT EXPERIENCE

TutorAI
Python, FastAPI, LangChain, QDrant, AWS EC2, PyTest

- Led the architecture and development of a RAG tutoring platform using FastAPI, LangChain, and AWS, reducing query latency by 30%.
- Designed relational database schemas and optimized SQL queries for backend services.
- Wrote automated unit and integration tests with PyTest to validate API behavior and prevent regressions, tied together with a CI/CD pipeline using GitHub Actions.

Cooking Companion
Python, SQLAlchemy, FastAPI, ReactJS, Pytest, Postman

- Designed and implemented backend services for a recipe storage and grocery list application, including schema design and RESTful API development using FastAPI and SQLAlchemy.

Tarpaulin Course Management
Postman, Python, FastAPI, Auth0, Google Cloud Datastore & Storage

- Developed secure FastAPI REST APIs with Auth0 authentication and validated functionality using Postman, achieving full test coverage.

TECHNICAL SKILLS

Python • FastAPI • TypeScript • React • SQL • PostgreSQL • MongoDB • AWS EC2 • Google Cloud • Ansible • Git • CI/CD • PyTest • LangChain • REST APIs • JWT • SQLAlchemy

EDUCATION

Oregon State University Corvallis, OR
Bachelor of Science in Computer Science, Cum Laude (GPA: 3.53) 2025
